PRA LEVAH!

What is the advantage of fractioned packaging?

Fractionated packaging offers more safety for your products and recipes. They are packed directly at the factory, avoiding contact with infectious agents while they are exposed on the shelf.

This line offers many options in different formats and capacities.

Safe and clean packaging to enhance your results.

The environmental issue is object of special care by Galvanotek. The products manufactured by Galvanotek are fully recyclable.

RECICLOS, Galvanotek

Galvanotek faces its environmental responsibility with seriousness and technology. Through processes approved by Anvisa, all products have a percentage of recycled material in their composition and are recyclable, keeping this cycle turning endlessly.

This is Galvanotek's commitment, and what is yours? You are also responsible for caring for the environment. Re-think, re-use, re-signify... Each package counts and each person is an important part in this recycling process.

Capacity of the products in "ml", corresponds to the density of water.

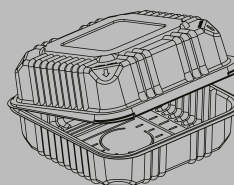

PET - Polyethylene terephthalate

Provides an excellent barrier against gases and odors. Used in the manufacture of bottles, food packaging, trays, pots, etc. Transparent and water- proof material.

PP - Polypropylene

Note: Standard volumes in the descriptions are base + lid combined.

→ 32 oz.
+ = 64 oz.
→ 32 oz.

64 oz. Square Clear Container with Hinged Lid

Note: Standard volumes in the descriptions are base + lid combined.

INSTITUCIONAL

With more than 30 years of experience, Galvanotek has conquered the confidence of consumers and suppliers by offering to the market solutions in plastic packaging with high quality, thanks to the investment in research, human capital and last generation technology. As a result, the company consolidates itself as one of the largest manufacturers of plastic packaging from Brazil and its products supply the Brazilian market and are exported to several countries in the world.

Nowadays, it is installed in an industrial park with more than 70,000m², with capacity for transformation of 5,000 tons of plastic per month and it has as commitment to offer to the market the best and the most recent in terms of packaging. The parent company is situated in the city of Carlos Barbosa and the subsidiary in Barão, both in Rio Grande do Sul.

The main mission of Galvanotek is to offer solutions in plastic packaging, adding value to the customer's business in an innovative and sustainable way. Therefore it searches endlessly to achieve the highest standards of confidence and security in all its products through certifications and qualifications. The achievement of certification ISO 9001 (International Organization for Standardization) is linked to an adequate management of the company, always aiming the quality of the product, with a strict quality control in all the phases of the manufacturing, personal development and continuous improvement.

In the competitive market of food products, the food safety is a fundamental requirement to the companies that supply foods and packaging. Taking that into account, the constant concern for ensuring food safety for the food that will be packed in its packagings made Galvanotek search another important certification, the FSSC 22000. The Food Safety System Certification is recognized both nationally and internationally and it has as objective to ensure the correct manufacture of the product in all its stages, preventing the contamination of the packaging. The implantation of the Good Manufacturing Practices Program, composed by a set of rules for the correct manufacture and manipulation that includes from the raw material until the final product, is allied to the commitment with the final consumer.

Motivated to ensure working conditions that do not entail risk to the health and safety of its workers and all persons involved with its activities, Galvanotek has its management system certified in ISO 45001. Through this achievement, Galvanotek demonstrates its commitment to the promotion of a healthy and safe environment for all.

Check out in our catalog all the line of solutions in plastic packagings.

ORIENTAL LINE

This line is manufactured with anti-fog technology, which prevents the lid from overheating (which occurs when the product is exposed to temperature changes), maintaining good visibility and enhancing the presentation of the packaged product.

OVEN LINE

IT’S BETTER IN THE OVEN.

Galvanotek Embalagens is the first company in Brazil to develop products using the raw material CPET, which allow freezing up to -22°F and heating up to 401°F. Ideal for packaging, transport, storage and preparation of foods in conventional ovens or microwaves.

LIDS CANNOT GO IN THE OVEN.

MATERIAL PET BIOBASED COLOR OF THE BASE CLEAR

- Biobased is a material obtained entirely or partly from renewable resources.
- The main and most important advantage of using Biobased plastics is the decrease in dependence on materials obtained from non-renewable fossil sources (oil).
- Biomass resources are abundant and 100% renewable, in addition to reducing the emission of greenhouse gases.
- Galvanotek is using rice hulls and/or wood fiber as a resource of this material.

- Benefits:
- Increase of Shelf Life.
 - Allows sealing and application of MAP (Modified Atmosphere Packaging).
 - Eliminates the need of liquid retainer (absorbent) in the tray.
 - Facilitates cooling, since PET is not a thermal insulator.
 - Trays with resistant structure.

LEARN MORE ABOUT OUR PRODUCT LINES:

DAIRY

Attractively designed packaging for dairy products, jams and fruit jellies that stand out on the shelf and boost sales of your products.

HIGH PERFORMANCE

The High Performance Line is developed with exclusive technology that allows hot filling and pasteurization, guaranteeing the shelf-life required for canned foods. It can be used in the same way as glass jars, whether in cooking pots, immersion tunnels or steamers. Made from 100% recyclable PET, it reduces weight and eliminates the risk of breakage.
